**CALL FOR PAPERS**

for the

**22nd EuroAsiaSPI² Conference**

http://2015.euroasiaspi.net
Workshops are interactive and allow participants to jointly elaborate key values and principles.

Since 2010 EuroSPI has been building workshop communities for the following topics:
- SPI & Innovation
- SPI and Product, System, Software Design
- Experiences with Functional Safety Implementation
- SPICE Assessors
- Business Process Innovation and Improvement
- SPI and Measurement
- SPI in SMEs
- Enterprise Management Paradigms & Models

These communities will publish a call on the EuroAsiaSPI website to attract key papers. Three key papers per workshop will be published in the Springer Communications in Computer and Information Science (CCIS) Series.

You can also propose a new workshop to build a new community around EuroSPI:
- one-day workshop
- 2 pages abstract with title, content, CV and picture of the workshop moderator
- final submission of workshop materials
- reviewed by a separate programme committee.

In 2015 the traditional EuroSPI Conference Series will be extended to EuroAsiaSPI, therefore the conference will take place in Ankara, Turkey, which plays a key role and is an important link between European and Asian countries.
